Hybridoma Development

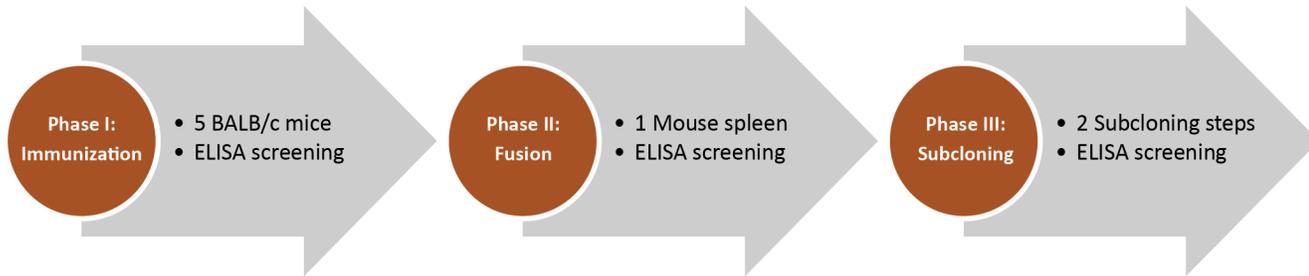

HIGH PERFORMANCE ANTIBODIES ... AND MORE

Broad Antibody Catalog
Extensive Antibody Services

HYBRIDOMA DEVELOPMENT

Established in 1998, ProSci Incorporated is a leading provider of high performance antibodies and custom antibody services. We offer two convenient packages along with add-on services. Our hybridoma development is divided into three phases as shown below. Please contact us for your custom antibody needs.

HYBRIDOMA DEVELOPMENT PACKAGES

Item	Basic Package	Peptide Package
Peptide Synthesis up to 25 amino acids, HPLC purity >90%		●
Peptide Conjugation to carrier protein		
Phase I: Immunization (13-16 weeks) <ul style="list-style-type: none"> Immunization of 5 BALB/c mic ELISA testing of serum 	●	●
Phase II: Fusion (2-3 weeks) <ul style="list-style-type: none"> Fusion of 1 mouse spleen ELISA screening 	●	●
Phase III: Sub-Cloning (4-6 weeks) <ul style="list-style-type: none"> 2 Subclonings steps ELISA screening 	●	●
Isotyping of final clones	●	●

Add-on Services

- Additional ELISA screening
- Western blot screening
- Immunocytochemistry screening
- Additional final clones
- Additional clone isotyping

Monoclonal Antibody Production

- Ascites production
- *In vitro* production
